

Gulmay Medical News: August 2008

Gulmay Medical Inc and Gulmay Inc Team up to provide service and customer support in USA

Gulmay Medical Inc and Gulmay Inc have decided to join forces in the USA to provide first class service and customer support.

Adrian Treverton Sales Director Gulmay Medical said:

“Sales of our XSTRAHL range of X-ray therapy machines are growing due to increased incidents of skin cancer. Having a low cost means of delivering radiation allows doctors to extend the services they can provide without a large capital investment. Teaming up with Gulmay allows us to provide ongoing first class service and support to our new and existing XSTRAHL & Therapax customers.”

Gulmay's state of the art facilities in Atlanta GA

Mark Jewell – VP North American Operations said:

“Combined North American operations optimize resources and product availability allowing us to better serve our customer’s”

Gulmay Medical and Gulmay will operate out of their state of the art facilities in Atlanta GA. The 5,000 Square foot facility has space for storage of parts and new systems as well as a comprehensive test bed. Spare parts can be provided on a next day service and there is always a technical person available on the phone to answer any questions. All of the engineers will be cross trained on Gulmay NDT, Gulmay Medical and Therapax systems.

About Gulmay Medical:

Gulmay Medical design and manufacture their range of Xstrahl x-ray therapy and scientific research systems. The XSTRAHL systems cover Grenz, Superficial and Orthovoltage X-rays, each unit can be tailored to the customers clinical requirements. With over fifteen years experience they have installed world class X-ray therapy systems in more than 500 clinics worldwide. They support the clinical application of the technique with STEP; an interactive Superficial Therapy Educational Program, available on CD and Online. A worldwide network of distributors allows them to provide comprehensive sales and product support, training and engineering service.
